

# Rennes Atalante Villejean

A site to set up companies of the **medical technology sector** in the heart of a teaching hospital complex and a university campus of 13,500 people.

- > You wish to **collaborate with the research teams** of the Inserm, the teaching hospital centre, the oncology centre... ?
- > You look for the **nearness of the university**, the national public health college ?
- > You look for a **stimulating technological environment** for imaging, genomics and post-genomics, bioinformatics and news materials... ?

56 research units, a total of 2,000 people, are involved in the genomics cluster "Ouest-génopole".

6,500 students are trained every year in the faculty of medicine, pharmacy, odontology as well as in paramedical schools.

Testing of new products on cell culture, are carried out by the company Bioprédic.

CHU de Rennes (teaching hospital), an international leading centre for liver transplants.

## Come to the site Rennes Atalante Villejean

You will find:

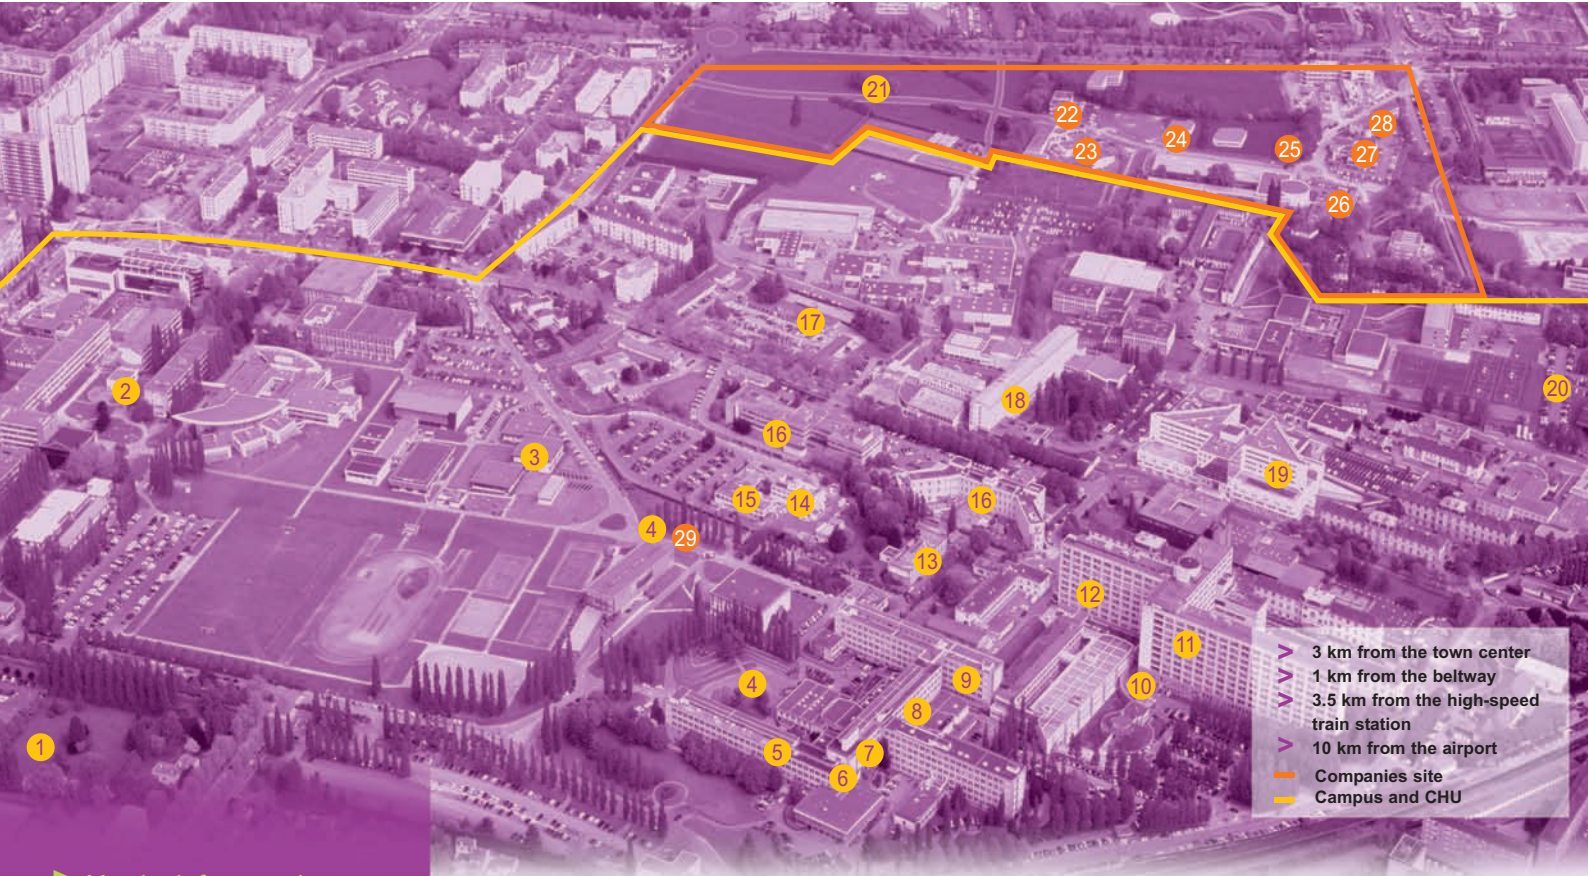

- a **medical university cluster** with 6,500 students and 6,500 researchers working for the teaching hospital, in a city of 60,000 people
- numerous scientific skills within **20 research units**
- **450 clinical research trials** underway
- **Ouest-génopole** (21 of the 56 laboratories involved are located in Rennes)
- the **Cancéropole** grand Ouest
- a **biological resources** centre
- a **clinical investigation** centre
- a unique set of **technical platforms** (imaging, transcriptomics, proteomics, supercomputer...),
- the Critt Santé Bretagne (technology transfer)
- the public research incubator **Energys**
- private rental premises
- the subway and 3 bus routes

R&D laboratories, start-ups, service companies...

*Be there where science progresses*

The Rennes Atalante association will help to become part of the park's networks of companies and players in the research sector: invitations to conferences, contacts with partners, listing in the park's directory and website...).
